

LLI WORKSHOP

FACTSHEET

BACKGROUND

What is LLI and what does it do?

Liaison – Livestock Industry (LLI) is a function in the response structure in an emergency animal disease (EAD) response. Appointed by the peak industry body, LLI personnel represent their industry in the response and support response activities by acting as the conduit of information between their industry and the response. This function is distinct from functions within the Incident Management Team (Finance and Administration, Logistics, Planning, Public Information and Operations).

WORKSHOP PARTICIPANTS

Target audience

The workshop is targeted to industry personnel with expertise, knowledge and characteristics relevant to their industry and as nominated by their peak industry body. Additional stakeholders from jurisdictional biosecurity agencies and industry liaison representatives from other agriculture sectors are often invited to present or participate at the training.

Note: LLI workshops are distinct from workshops aimed at raising general awareness of the Australian animal health system and EAD response structures and arrangements.

Assumed knowledge

Individuals participating in the workshop are assumed to have:

- Strong leadership skills
- Recognition by their peak industry body that they have the authority to represent them at the state and local level/s
- Authority to apply policy and commercial decisions on behalf of their industry
- Authority to seek resources from industry to the response
- Extensive knowledge of the state-wide structure and operations of their industry
- Balanced knowledge of the scientific, political, legal and management aspects of a response
- Well-developed networking and negotiation skills
- Ability to build and maintain positive relationships
- Ability to maintain appropriate levels of confidentiality.
- Completed AHA's Liaison - Livestock Industry online course.
